Subject Index

***Acanthamoeba* keratitis**
Broad spectrum antimicrobial activity of a new multi-purpose disinfecting solution, 120
Diagnosis and management of *Acanthamoeba* keratitis, 47
Methods used to evaluate the effectiveness of CL care solutions and other compounds against *Acanthamoeba* : A review of the literature, 72

Apoptosis
Elusive causes of keratoconus: A working hypothesis, 10

Astigmatism
Management of irregular astigmatism with RGP CLs, 14
Peripheral corneal contour measured by topography influences soft toric contact lens fitting success, 180

Bandage contact lenses
Disposable CLs in penetrating keratoplasty, 127
Microbiological study of disposable soft CLs after photorefractive keratectomy, 26

Bifocal contact lenses
Evaluation of the Zebra 2000 (Z-10) Breger Vision bifocal contact lens, 220

Contact lenses (CLs)
1-Day Acuvue vs. Focus Dailies: A comparison of comfort, user preference, and incidence of corneal complications, 141
A look back and a glance ahead (editorial), 6
Assessment of ophthalmology residents' CL training, 221
Broad spectrum antimicrobial activity of a

Subject Index

***Acanthamoeba* keratitis**
Broad spectrum antimicrobial activity of a new multi-purpose disinfecting solution, 120
Diagnosis and management of *Acanthamoeba* keratitis, 47
Methods used to evaluate the effectiveness of CL care solutions and other compounds against *Acanthamoeba* : A review of the literature, 72

Apoptosis
Elusive causes of keratoconus: A working hypothesis, 10

Astigmatism
Management of irregular astigmatism with RGP CLs, 14
Peripheral corneal contour measured by topography influences soft toric contact lens fitting success, 180

Bandage contact lenses
Disposable CLs in penetrating keratoplasty, 127
Microbiological study of disposable soft CLs after photorefractive keratectomy, 26

Bifocal contact lenses
Evaluation of the Zebra 2000 (Z-10) Breger Vision bifocal contact lens, 220

Contact lenses (CLs)
1-Day Acuvue vs. Focus Dailies: A comparison of comfort, user preference, and incidence of corneal complications, 141
A look back and a glance ahead (editorial), 6
Assessment of ophthalmology residents' CL training, 221
Broad spectrum antimicrobial activity of a

new multi-purpose disinfecting solution, 120
Clinical characterization of spherical post-lens debris associated with lotrafilcon high-Dk silicone lenses, 185
Comparative study of the hydration of hydrophilic CLs by refractive index and gravimetry, 200
Comparison of CL-related complications in various daily wear modalities, 204
Determination of protein deposits on RGP lenses by x-ray photoelectron spectroscopy, 18
Diagnosis and management of *Acanthamoeba* keratitis, 47
Disposable CLs in penetrating keratoplasty, 127
Effects of RGP lens extended wear on glucose-lactate metabolism and stromal swelling in the rabbit cornea, 30
Effects of one-hour wear of high-Dk soft CLs on corneal pH and epithelial permeability, 130
Efficiency and accuracy of two computerized topography software systems for fitting RGP CLs, 91
Elusive causes of keratoconus: A working hypothesis, 10
Endothelial cell density of the cornea during RGP CL wear, 146
Evaluation of the Zebra 2000 (Z-10) Breger Vision bifocal contact lens, 220
Evaluation of a new system of lens parameter selection and comparison of traditional vs one-step lens care systems for aspheric high-Dk RGP CLs, 193
Evaluation of the PuriLens CL care system: An automatic care system incorporataing UV disinfection and hydrodynamic shear cleaning, 134
Fungal keratitis in a soft CL wearer, 166
Hydrogel contact lens ageing, 85
Large soft CLs in the management of leaking blebs, 37
Management of irregular astigmatism with RGP CLs, 14
Methods used to evaluate the effectiveness of CL care solutions and other compounds against *Acanthamoeba* : A review of the literature, 72
Microbiological study of disposable soft CLs after photorefractive keratectomy, 26
Peripheral corneal contour measured by topography influences soft toric contact lens fitting success, 180
Prevalence and pattern of CL lens use in a Singapore community, 21

Contact lens complications
1-Day Acuvue vs. Focus Dailies: A comparison of comfort, user preference, and incidence of corneal complications, 141
Comparison of CL-related complications in various daily wear modalities, 204

Contact lens deposits
Determination of protein deposits on RGP lenses by x-ray photoelectron spectroscopy, 18

Contact lens disinfection
Broad spectrum antimicrobial activity of a new multi-purpose disinfecting solution, 120
Determination of protein deposits on RGP lenses by x-ray photoelectron spectroscopy, 18
Evaluation of a new system of lens parameter selection and comparison of traditional vs one-step lens care systems for aspheric high-Dk RGP CLs, 193
Evaluation of the PuriLens CL care system: An automatic care system incorporataing UV disinfection and hydrodynamic shear cleaning, 134

Contact lens fitting software
Efficiency and accuracy of two computerized topography software systems for fitting RGP CLs, 91

Contact lens research
Contact lens research in 1999 (letter), 64

Contact lens solutions
Broad spectrum antimicrobial activity of a new multi-purpose disinfecting solution, 120
Determination of protein deposits on RGP lenses by x-ray photoelectron spectroscopy, 18
Diagnosis and management of *Acanthamoeba* keratitis, 47
Methods used to evaluate the effectiveness of CL care solutions and other compounds against *Acanthamoeba* : A review of the literature, 72

Corneal disorders/disease
Denovo development of corneal guttae and Fuchs' dystrophy in corneal grafts, 44
Effects of RGP lens extended wear on glucose-lactate metabolism and stromal swelling in the rabbit cornea, 30
Elusive causes of keratoconus: A working hypothesis, 10
Infectious crystalline keratopathy, 40
Large soft CLs in the management of leaking blebs, 37
Phototherapeutic keratectomy for anterior scarring in an epikeratophakia lenticule, 52

Corneal epithelium
Effects of RGP lens extended wear on glucose-lactate metabolism and stromal swelling in the rabbit cornea, 30
Effects of one-hour wear of high-Dk soft CLs on corneal pH and epithelial permeability, 130

Corneal hypoxia
A look back and a glance ahead (editorial), 6

Corneal topography
Efficiency and accuracy of two computerized topography software systems for fitting RGP CLs, 91
Elusive causes of keratoconus: A working hypothesis, 10
Intraoperative PAR Corneal Topography System (CTS): comparison of its keratometric readings to manual keratometer, auto-keratometer, Eyesys Corneal Analysis System, and slit lamp PAR CTS in healthy eyes, 151
Is intraoperative topography predictive of postoperative topography changes following refractive surgery, 97
Peripheral corneal contour measured by topography influences soft toric contact lens fitting success, 180

Corneal ulcers
A look back and a glance ahead (editorial), 6
Comparison of CL-related complications in various daily wear modalities, 204
Diagnosis and management of *Acanthamoeba* keratitis, 47

Disposable contact lenses
1-Day Acuvue vs. Focus Dailies: A comparison of comfort, user preference, and incidence of corneal complications, 141
A look back and a glance ahead (editorial), 6
Comparison of CL-related complications in various daily wear modalities, 204
Disposable CLs in penetrating keratoplasty, 127
Microbiological study of disposable soft CLs after photorefractive keratectomy, 26
Prevalence and pattern of contact lens use in a Singapore community, 21

Dry eye
Dry eye: Towards a new understanding (editorial), 118
Why the eye becomes dry: A cornea and lacrimal gland feedback model, 159

Editorials
A look back and a glance ahead, 6
CL residency training: Progress and challenges, 172
Dry eye: Towards a new understanding, 118
Joseph Soper and Jonathan Kersley: Two lives of exemplary service, 62

Extended wear
Clinical characterization of spherical post-lens debris associated with lotrafilcon high-Dk silicone lenses,185
Diagnosis and management of *Acanthamoeba* keratitis, 47
Effects of RGP lens extended wear on glucose-lactate metabolism and stromal swelling in the rabbit cornea, 30
Effects of one-hour wear of high-Dk soft CLs on corneal pH and epithelial permeability, 130

Microbiological study of disposable soft CLs after photorefractive keratectomy, 26

Frequent replacement contact lenses
Hydrogel contact lens ageing, 85
Microbiological study of disposable soft CLs after photorefractive keratectomy, 26

Fuchs' dystrophy
Denovo development of corneal guttae and Fuchs' dystrophy in corneal grafts, 44

Giant papillary conjunctivitis
Comparison of CL-related complications in various daily wear modalities, 204

In memoriam
Henry Jonathan Kersley, 1939–2000, 66
Joseph William Soper, 1925–1999, 70

Infectious crystalline keratopathy
Infectious crystalline keratopathy, 40

Keratoconus
Denovo development of corneal guttae and Fuchs' dystrophy in corneal grafts, 44
Elusive causes of keratoconus: A working hypothesis, 10
Management of irregular astigmatism with RGP CLs, 14

Intrastromal corneal ring
Is intraoperative topography predictive of postoperative topography changes following refractive surgery, 97

Laser in situ keratomileusis (LASIK)
Characteristics of the myopic patient population applying for refractive surgery,102
Contact lens fitting difficulties following refractive surgery for high myopia, 106

Letters to the editor
Contact lens research in 1999, 64

Microbial keratitis
Broad spectrum antimicrobial activity of a new multi-purpose disinfecting solution, 120
Fungal keratitis in a soft CL wearer, 166
Infectious crystalline keratopathy, 40
Microbiological study of disposable soft CLs after photorefractive keratectomy, 26

Myopia
Characteristics of the myopic patient population applying for refractive surgery,102
Contact lens fitting difficulties following refractive surgery for high myopia, 106
Is intraoperative topography predictive of postoperative topography changes following refractive surgery, 97
Prevalence and pattern of CL lens use in a Singapore community, 21

Ophthalmia nodosa
Ophthalmia nodosa caused by casual handling of a tarantula, 111

Oxygen transmissibility
Clinical characterization of spherical post-lens debris associated with lotrafilcon high-Dk silicone lenses,185
Effects of one-hour wear of high-Dk soft CLs on corneal pH and epithelial permeability, 130

Penetrating keratoplasty
Denovo development of corneal guttae and Fuchs' dystrophy in corneal grafts, 44
Disposable CLs in penetrating keratoplasty, 127
Management of irregular astigmatism with RGP CLs, 14

Photorefractive keratectomy (PRK)
Contact lens fitting difficulties following refractive surgery for high myopia, 106
Is intraoperative topography predictive of postoperative topography changes following refractive surgery, 97
Microbiological study of disposable soft CLs after photorefractive keratectomy, 26

Phototherapeutic keratectomy (PTK)
Phototherapeutic keratectomy for anterior scarring in an epikeratophakia lenticule, 52

Presbyopia
Evaluation of the Zebra 2000 (Z-10) Breger Vision bifocal contact lens, 220

Pseudomonas aeruginosa
Broad spectrum antimicrobial activity of a new multi-purpose disinfecting solution, 120

Refractive surgery
Characteristics of the myopic patient population applying for refractive surgery,102
Contact lens fitting difficulties following refractive surgery for high myopia, 106
Is intraoperative topography predictive of postoperative topography changes following refractive surgery, 97
Microbiological study of disposable soft CLs after photorefractive keratectomy, 26

RGP contact lenses
Determination of protein deposits on RGP lenses by x-ray photoelectron spectroscopy, 18
Effects of RGP lens extended wear on glucose-lactate metabolism and stromal swelling in the rabbit cornea, 30
Efficiency and accuracy of two computerized topography software systems for fitting RGP CLs, 91
Endothelial cell density of the cornea during RGP CL wear, 146
Evaluation of the Zebra 2000 (Z-10) Breger Vision bifocal contact lens, 220
Evaluation of a new system of lens parameter selection and comparison of traditional vs one-step lens care systems for aspheric high-Dk RGP CLs, 193
Management of irregular astigmatism with RGP CLs, 14

Spectacles
Impact of variable tint optics (Transitions® Gray) on vision-related quality of life in normal volunteers: A randomized clinical comparison in a warm climate, 225

Toric contact lenses
Peripheral corneal contour measured by topography influences soft toric contact lens fitting success, 180

Ultraviolet contact lens disinfection
Evaluation of the PuriLens CL care system: An automatic care system incorporataing UV disinfection and hydrodynamic shear cleaning, 134
